Subject Index

Ab initio calculations 50
Absorption coefficient 314
AM1 321
Amorphous 279

β-diketonates 50
Baking process 199
Bound exciton 115

Cathodoluminescence 69, 183, 191, 235
$Cd_{0.96}Zn_{0.04}Te$ 235
CdTe 235
Color centers 169
Concentration effects 33
Co-precipitation 69
Cyanine dyes 1

Decay time 115
Defects 235
Degradation mechanism 199

Electrolytic coloration 169
Electronic excitation 156
Emission cross-section 27
Energy transfer 156
Enhanced fluorescence 1
Erbium-doped ORMOSIL film 214
Eu^{2+} 199
Extinction coefficient 314

femtosecond 301
Fluorescein 314
Fluorescence decay 221
Fluorescence standard 314
Fluorimetry 305
FT-IR spectroscopy 243

Heparin 305
Hole burning 156
Hydroxyl-doped sodium chloride crystal 169

III–V compounds 329
Impurity levels 137
Inclusion complex 94
Infrared luminescence 100
Infrared radiometry 151
Intensity noise 129
Irradiation 9

Lanthanides 79
Laser irradiation 243
Laser spectroscopy 100
Layered semiconductor 137
LCMD 79
Lifetime 17, 27
Luminescence 79, 249, 329
Luminescent particle 161
Luminescent properties 285

Maleimide 321
MESF 314
Methanol-in-oil-droplet 1
Microstructure 249
Monte Carlo calculations 191

Nanoparticles 174
Near-infrared emission 265

Optical absorption 121
Optical properties 109
Optical-transitions 235
Oxygen quenching 33
Oxytetracycline (OTC) 94

PDP (Plasma display panel) 199, 271
Phosphor 174
Phosphor degradation 191
Phosphorescence 33
Photobleaching 9
Photoluminescence 9, 50, 64, 69, 89, 121, 137, 214, 229, 243, 258, 279, 291
Photo-luminescent properties 45
PL enhancement 243
PL stabilization 243
Point defects 109
Porous semiconductors 329
Pressure-sensitive paint (PSP) 33

Quantum confinement 64
Quantum dot 129
Quantum yield 17

doi:10.1016/S0022-2313(05)00128-6

Rare earth 174, 291
Rare earth doping 329
Rare-earth borate glass 121
Relaxation time 129
Reverse micelles 1

Self-trapped exciton 143
Sol–gel 285
Sol–gel process 45, 214
Solid-state reaction 45
Spatial confinement 1
Spectrofluorimetric method 94
Spectroscopic properties 214
Spectroscopy 221
Spherical 249
Spray pyrolysis 183, 249
SRM 1932 314
Stokes shift 321
Surface defect state 115
Synchrotron radiation 143

Telluride glass 27
Terahertz 301
Thermal radiation 151
Thermoluminescence 89, 151
Time-resolved 258
Time-resolved luminescence 17
Trifluorides 143

Up-conversion 100, 174
UPT 174

VUV 143

X-ray diffraction 50, 285

YF_3 143
Yb^{3+} 27

ZINDO 321

Materials Index

1,10-phenanthroline 50
1-(2-naphthoyl)-3,3,3-trifluoroacetone 50

2,2′-bipyrimidine 50

$BaMgAl_{10}O_{17}$ 199

Cathodoluminescence 191
$Cd_xHg_{1-x}Te$ 301
Conjugated polymer 156
Cr^{4+} 109

Doxycycline 305

Ethyl substituted β-cyclodextrin 94
Eu 249
Eu^{3+} ion doped 45
Europium 50, 121, 305
Europium (Eu^{3+}) 94

Gadolinium 50

Lanthanides 17
Lanthanum phosphate 271
Laser material 100
Lipophilic complex 79

MCM-41 258
Multilayers 64

Nanocrystal 69, 229
Nanoparticles 161, 174
Ni-doped material 265

$PbWO_4$ crystal 109
Phosphors 161, 174, 191, 199, 249, 271, 285
Platinum porphyrin 33
Polymer films 33
Porous silicon 243

Rare-earth oxides 161

Samarium 17, 121
Si 229
Silicon 64
Silicon oxidized 279
Silver-halide fibers 151
SiO_2 229
Sm^{2+} ion 9
Sol–gel 291
$SrY_2O_4:Eu^{3+}$ 285

Thin films 183, 279, 291
Thulium 271

Y_2O_2S:Ti Long persistent phosphor 89
Y_2O_3 249
Yb^{3+} 27
Ytterbium laser glass 221

Zn-doped GaS 137
ZnO 183
ZnO:Zn phosphor 115
$ZnS:Mn^{2+}$ 69

doi:10.1016/S0022-2313(05)00129-8
